Subject: RE: UMC cross VAS label part#AHUZ0LEM1 and part#ABUZ0LEM1
Attachments: Entegris PackingList.pdf; VAS label with batch.xls

Dear Raquel,

User will create a verification order by providing DN#, Entegris PN, Customer PN, Batch# and Order Qty based on Entegris Packing List.

He/she will scan the barcode Entegris PN, Customer PN and Batch# from physical carton box. System to verify correct data scan with right quantity and print out verification report.

Other requirements;

- (1) Batch scanning or Sequential scanning
 - a. Batch – use of batch scanner to scan all cartons and download into verification software. Batch scanning method will use when Physical item is too bulky and difficult to scan using with normal scanner.
 - b. Sequential – scan individual carton one at a time
- (2) Some order may not have customer PN for verification. In this case, system only needs to verify Entegris PN, Batch# and scan Qty.

Please let me know if anything in doubt.

Rgds,
kenneth

Dear Eddie / Raquel,

I need simple verification system to verify Entegris Part number, Batch number and Customer Part number against physical with barcoded label.
Please look for me on Monday, we need to implement this ASAP.

Rgds,
kenneth

Dear lily,

After discussion with our management, Schenker don't agree to bear all the cost for one to one exchange. This consequential cost is not under our Contract Agreement.
Schenker will only liable for goods loss & damage in Schenker warehouse or in delivery according to our contract.

We enforce and discipline our staff to give commitment to provide better service.
We will develop scanning verification system to verify Entegris and customer part number against Entegris Packing Order to avoid human error.
During implementation of scanning verification system, our staff will scan in excel file to verify that VAS label printed accurately and pasted correctly.

Find attached new sample label with bar-coded part number.

We apologize for inconvenience cause.

Rgds,
Kenneth Huang
