Subject: RE: Teleflex Marketing Samples - WMS

Dear Sam,

As spoken, I have cleared up the existing inventory balance in SWIMS for “**TELEFLEX-MKG**” .

Please check and do let me know if anything. Thanks

Thank You

Dear Vanitha,

Good day.

Would like to request for your assistance to clean up past years data in SWIMS - Teleflex Marketing.
There are still data in inventory balance, last transaction in 2014.

Thank you & best regards,

Sam, Wei Zheng (Mr)

Dear Steven

Yes, given the pros and cons we have to consider, it would be better to go with SWIM.

Vanitha could help SAM to clean up the past years data in SWIM. Thank You.

Dear Vanitha

Please assist to work with SAM on using SWIN to store those new lists of Non-Inventory items from Teleflex. Thank You.

Subject: RE: Teleflex Marketing Samples - WMS

Dear Wai Hung,
Good day,

Noted on that, so in short, we will still have to falls back to SWIM right?

If that the case, I guess, we have no other options but to go-ahead with SWIM then.

Understand from Sam, there are still past years data, can you assist to clean up so we have work on the new list of items into SWIM?

Regards
Steven

Subject: RE: Teleflex Marketing Samples - WMS

Dear Steven

Good Day. Thank you for your feedback.

I did an evaluation on this new requirement over Teleflex's WMS, setting up additional storer would not do away with the concerned on the EDI issues.

One concern would be the implementation effort as this may take months to go through the system **Thoroughly** to incorporate this additional logic. Such extensive changes would also mean system need time to Get stabilize.

Given the reduced volume after migration to PTP as well as the tight resource we experience right now, maybe it would better to keep the status quo for the time being.

Perhaps if needed, we can have a meeting to discuss further. Thank You.

Subject: RE: Teleflex Marketing Samples - WMS

Dear Wai Hung,
Good day,

Understand the concern / issue is due to EDI.

If that the case, can we create another storer without EDI interface?

Reason being, we'll need to churn report daily to Teleflex and does not make sense to operate on 2 systems

Let me know your take

Regards
Steven

Subject: RE: Teleflex: Marketing Samples & Non inventory items

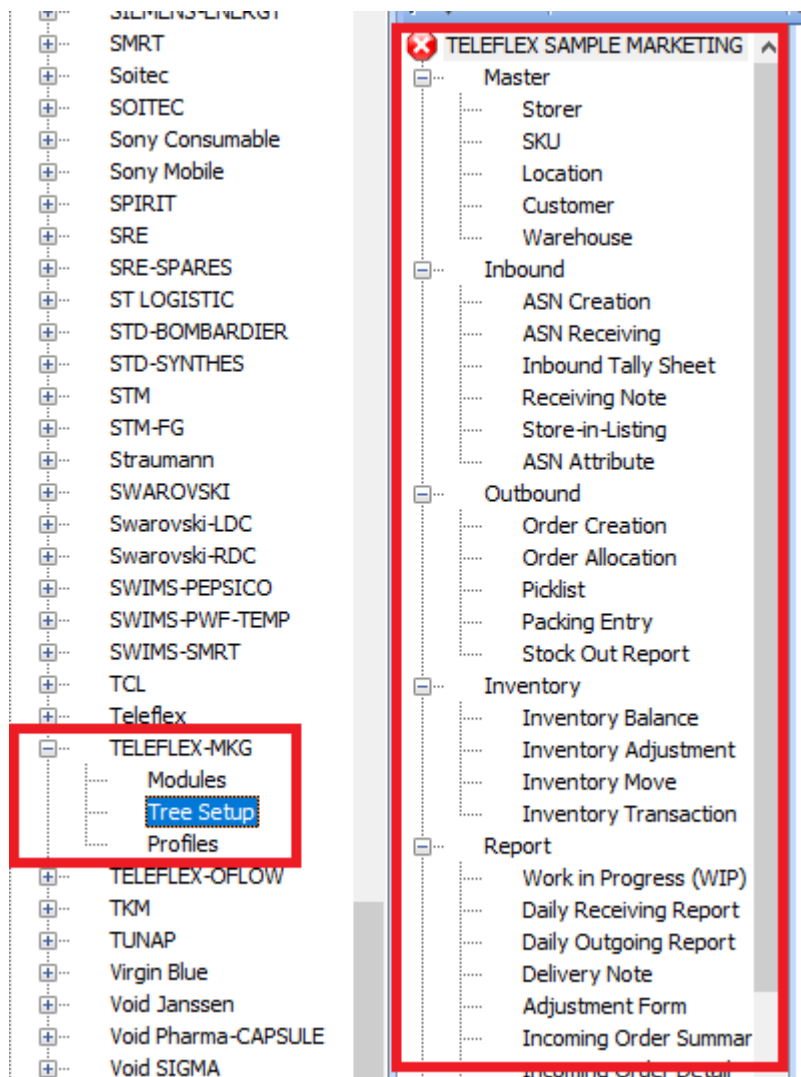

Hi Sam

Good Day.

Storing Non-Inventory Items into the current Teleflex WMS is not recommended as it would Cause EDI failure at Teleflex's SAP.

There is already in place in SWIM to manage Teleflex's Non-Inventory items (See Below)

You could get login id / password from the Ex-Teleflex Ops Team at SLC2. Thanks.

Subject: RE: Teleflex: Marketing Samples & Non inventory items

Hi Sam,

It is possible and can be handle at the system side but am not certain for some points at the cost side. We'll need to get Wai Hung's input as he has wider experience and more to say on this.

Will revert to you asap.

Also, please send sample data if you can for analysis and data mapping.

Thanks!

Subject: Teleflex: Marketing Samples & Non inventory items

Dear Elmer,

Good day.

We are exploring the use of current Teleflex WMS to store "non-inventory items."

Criteria:

1. No EDI messaging for these items.
2. A way to identify/segregate between inventory and non-inventory items.

Would it be possible to have it stored under another storerkey?

Is there any implications (cost/system) if we were to have this setup in production?

Thank you & best regards,
