Attachments: FSMS IP TransIN Spec.xls

Dear Dennis / Chia Bin,

As per our discussion yesterday, we can able to use "file transfer" method to link up with NI Hub and Fedex ship manager to print out Fedex Airway bill.

Dennis

To create new console Screen in NI Hub to consolidate the NI orders and trigger message "text file" to Fedex Ship manager.

Requirements as follows;

- Our staff has to select numbers of NI orders with same address in new NI Orders consolidation screen
- Our staff has to select the NI shippers accounts, duties & taxes
 - o NI Asean >> Shipper Freight Account#209883317 Duties & Taxes# "Blank and updateable"
 - o NI SDC >> Shipper Freight Account#34609950 Duties & Taxes# "Blank and updateable"
 - o NI SDC (AU) >> Shipper Freight Account#34609950 Duties & Taxes# 267122237
 - o NI SDC (NZ) >> Shipper Freight Account#34609950 Duties & Taxes# 270711413
 - o NI SDC (TW) >> Shipper Freight Account#34609950 Duties & Taxes# 200847881
- NI Hub to sum up the total number of cartons, total weights from packing details, and total custom value from NI Invoices.
 - o Note: Dimension not require
- NI Hub to extract invoice currency code e.g "USD", "MYS" etc
- Our staff can select type of packaging from drop down list of packaging type.
 - o Note: By default "our packaging".
- Our staff has to select the service type
 - o Note: By default "IP (International Priority)".
- Our staff has to select the special handling instruction "TPC" service (Y/N)
 - o Note: By default "Y" because most of the Fedex shipment were TPC
- For reference number, NI Hub to extract the first Invoice number and NI OE number. Format as "Invoice#31432 NIOE#65042"
 - o Please make it editable
- Our staff can select Package Description, Country of Manufacture from drop down list.
 - o Note: By default "Computer Parts", "HU".
- Our staff to verify information entered and execute to send file to Fedex Ship Manager

Chia Bin

Upon received of text file in Fedex Ship manager, Fedex system to verify Postal code and trigger alert to NI Hub if not recognize.

If all the data interface successful, print Fedex Airwaybill and Fedex Ship Manager to send back Fedex Airwaybill number to NI Hub.

Please provide List of Fedex service type to Dennis.

Thing to verify and follow up: Character limitation of address (NI HUB and Fedex Ship Manager)
 Dennis please let me know the target date for this. We need to inform NI about our progress.

Rgds,
 kenneth

Hi Dennis/Kenneth

attached the revised trans.in specification.
The 2nd worksheet is the trans.out with the awb number returned in field#29

Since the file transfer method is preferred, you may set the filename as orderno.in.
the FedEx software will processing the shipment and then create a new file call orderno.out.

Hence your system could look for orderno.out to obtain the awb# returned.

If you're using winsock, there will be interactive returned of awb# to host system.

Warmest Regards,
ChiaBin

Hi Dennis

I am attaching the transaction spec for your reference.

The transaction (which carries the shipment data - ship to addr, commodity desc, value, weight) can be either:
a) transmitted via (interactive) winsock from host system to FedEx software, or
b) via batch file transfer (eg 1 file 1 shipment record)

Warmest Regards,
ChiaBin

Hi Chia Bin,

Would like to meet up with you before we make any proposal on the solution for NI.

Pls let me know when can we meet in Schenker w/h together with Kenneth.

Hi ChiaBin,

Yes, Dennis Low is the SIN IT side manager for some customer projects. I'm not too familiar with David. I can share the work we have done for Cisco with Dennis if need be.

Do let me know when you are meeting up with him.

Hi Schenker SIN Team,

Do drop me a line and we can discuss this before meetup with FedEx.

Hi Derrick

I have another system integration with Schenker for this customer, National Instrument.

Not sure if you know Dennis / David from the IT side ?

Best Regards, ChiaBin

Dear Alex,

Dennis is on-leave today.

During meeting you requested to arrange Fedex and Schenker IT to discuss on how Fedex Ship manager system and Schenker NI Hub can link up to improve our Fedex Airway Bill processing time.

Schenker Hub to provide necessary data into Fedex Ship manager system to process Fedex Airway Bill. Which is to reduce typing of ship to address, cartons weights and dimensions, etc.

14/04/2009

Dear Kenneth,

I think Chin Chai should be able to help us arrange this meeting between Schenker and FedEx.

Dear Chin Chai,

Can you liaise with Chia Bin and Kenneth on this?

Thanks,
Azreena
