Hi Team,
 Not so clear.. let go through together later.

Thanks
 Best Regards

Subject: Ship Hold '12 No.34 - Multiple FG Product for India (HN/A) - MRP Net Contents

Hi Kok Cheng

We need to do the following for India

For the 4 MPNs, current stock is to be reworked this week. You have confirmed you received labels yesterday.

MC414HN/A
 MD031HN/A
 MD224HN/A
 MD223HN/A
 MD231HN/A
 MD232HN/A
 MD101HN/A
 MD102HN/A
 MD103HN/A
 MC975HN/A
 MD104HN/A
 MC976HN/A
 MD032HN/A

MD033HN/A

Except for the 4 you already have, for the above MPNs the OEM will ship MRP labels.

For the remainder of HN/A stock you need to create new labels as per the attached PDF.

The remainder consists of 2 categories; EOL and everything else where the OEM cannot supply new MRP labels for

- We should rework all the EOL product, to avoid any possible issues going forward
 - I have updated the Net Contents for these in the attached file.
- The rest of the products are to be reworked at the Singapore DC.
 - The existing MRP information on each individual product is to be replicated exactly, with the exception of adding the Net Contents.
 - I have attached samples of approved MRP Labels as a guide where to locate the Net contents

To summarise the actions;

1. rework 4 MPNs with labels received
2. rework 10 MPNs when the labels are received from the OEM.
3. rework the remainder of the MPNs (EOL and current) using your own created MRP label with the net content as per the attached.
4. Update your WMS to have accessories shipped including the net content. This is for the standard process where you apply the MRP during processing. Net content details in the attached.

On a related matter:

The new iPad mini now ships in a MultiPack (ie. 5 x individual FG units --> inner brown MP box --> Outer MP Box)

When shipping individual units, they have to be reboxed in outer carton, with end caps (similar to the iPad2)

QUESTION : If the iPad mini is deployed in Singapore DC and any have to individually ship to India (ie. CRU), is there a process to re-box AND include an MRP ? Where is the label applied, to the pretty box or the brown overbox?

Anything unclear, please call.

Regards
Emile
