Subject: statitic for merck kgaa from procars to exel
Attachments: merck kgaa.doc

dear chee leong,

as discussed pls note following specs which I would need to have in exel format.

mode: airexport from sin to asia
period: 01.01. - 31.12.06
customer resp. shipper: merck kgaa
consignee: all / undefined

need to see in exel basically the data as per attached screenshot per shipment row by row:

- date of shipment
- destination port
- charge weight (if possible also actual weight)
- if possible also what we have billed to our overseas station (total amount per shipment)

now it comes: I would need to have the same or similar for seafreightl. would you know who can help me here?

thanks for your soonest help.
