Hi, Rey & Pearline

As per tele-con this morning, the logic for 303 & 305

1) Movement transfer 303 – all SKUs will be move to "hold" location and "in-transit" Stock type
2) Movement transfer 305
   a) If 305 is transfer to **unrestricted**, system to validate the SKU from "in-transit" , if SKU is "**restricted**", 305 to transfer to location " A8888A1"
   b) If 305 is transfer to **restricted**, system to validate the SKU from "in-transit" , if SKU is "**unrestricted**", 305 to transfer to location " A8888A1"
   c) If 305 is transfer to **restricted**, system to validate the SKU from "in-transit" , if SKU contains "**unrestricted**" & "**restricted**", 305 cannot be auto, user to do manual. System to prompt user "no unique stock type, user to do manual"
   d) If 305 is transfer to **unrestricted**, system to validate the SKU from "in-transit" , if SKU contains "**unrestricted**" & "**restricted**", 305 cannot be auto, user to do manual. System to prompt user "no unique stock type, user to do manual"
   e) If 305 is transfer to **unrestricted**, system to validate the SKU from "in-transit" , if SKU contains "**unrestricted**" only, system to retrieve back the old location of the SKU by tracing "lot#" & "LP"

Thanks & Best regards
