Tay, Jyh Huey

Hi, Rey & Pearline

As per tele-con this morning, the logic for 303 & 305

1) Movement transfer 303 – all SKUs will be move to "hold" location and "in-transit" Stock type
2) Movement transfer 305
   a) If 305 is transfer to **unrestricted**, system to validate the SKU from "in-transit" , if SKU is "**restricted**", 305 to transfer to location " A8888A1"
   b) If 305 is transfer to **restricted**, system to validate the SKU from "in-transit" , if SKU is "**unrestricted**", 305 to transfer to location " A8888A1"
   c) If 305 is transfer to **restricted**, system to validate the SKU from "in-transit" , if SKU contains "**unrestricted**" & "**restricted**", 305 cannot be auto, user to do manual. System to prompt user "no unique stock type, user to do manual"
   d) If 305 is transfer to **unrestricted**, system to validate the SKU from "in-transit" , if SKU contains "**unrestricted**" & "**restricted**", 305 cannot be auto, user to do manual. System to prompt user "no unique stock type, user to do manual"
   e) If 305 is transfer to **unrestricted**, system to validate the SKU from "in-transit" , if SKU contains "**unrestricted**" only, system to retrieve back the old location of the SKU by tracing "lot#" & "LP"

Thanks & Best regards

Hi Pau Ling

The no rows populated error means there are no 302 type stock for the sku.
For testing purposes we can use MOVE/Adjustment functionality to have stocks for the sku.

Hi Pau Ling and Jyh Huey

Good day

Files are uploaded to our test server. Please check the uploaded data and try the allocate function
but do not yet finalize so as we can still do correction on the transactions.

Once we can confirm that the allocate function is correct we can do the finalize.

Hi Arnold

Thanks for the information regarding the files on the FTP server.

As I have requested last week please resend those files. I was not able to download them as not to mix them with the test files that I was using.
The test files would have been used for the operations testing. And they might have been removed when you had your internal testing on the server.

Best Regards,

Hi Rey,

My colleague created this one for internal testing reasons (new EHP version), in this case just a standard delivery with our main location 0301. With other words: location 0301 is here correct.

I propose just to focus on the EDI documents created and informed by myself respective related to the by Schenker requested business cases (here 0302 as "central point") ->

Best Regards,
Arnold.

Hi Rey,

Segment definition E2BPOBDLVITEM001 is released since SAP release 46C and actually we are working with release 730 therefore E2BPOBDLVITEM003.
I assume (but not sure) you can modify this, just try (I guess this is also done/working at the other locations and as mentioned before the set up should be a 100% copy exact from location 0301).

Best Regards,
Arnold.

Hi Pearline,

As discussed during our today's conference call below the IDoc data related to movement type 303 and 305 (red marked the location from where it should picked with movement type 303 to where it should go to with movement type 305).

By the way: we do not like to loose more time therefore the focus will be fully at location 0302. Here also because as mentioned by you there is not a question mark for the other already known movement types (including 303/305), which are actually implemented for location 0301 and 03RE.

Please update me as soon as possible where there is any news.

Best Regards,
Arnold.

Hi Pearline,

This sounds already much better and I agree gaps where we think it will have high impact to the daily business should be closed before we are going live. But we need to close all within a short time, I do not like to see more delay due to whatever reason.

I am looking forwards for a constructive plan.

Best Regards,
Arnold.

Hi Arnold,

Apologies for the confusion and the amount of time taken to test the change.

I understand from Rey that the other movement types for transfer have not been tested yet. On top of that, ops seem to find some issue in the system though the confirmation file is returned correctly.

Appreciate if you can allow us some time to reconcile the gaps. We will get in touch with you next Mon/Tue after our discussion internally.

Once again, we apologize for the delay but we do want to make sure we get this right before deployment. Appreciate your kind understanding.

Hi Jyh Huey,

Sounds like you are not aware about what we have already done (although you are copied all the time). Reason saying: we - Rey and myself - made already several tests with the movement type 303 and 305 from location 0301 to 0302. Besides during the start of the project you was informed what we want to reach. I am getting more and more upset about your reaction respective less cooperation to get the request done.

Regards,
Arnold.

Hi Jyh Huey,

I am totally lost and disappointed. Why you requested this now since you are saying we need to start from the beginning again. Please be so kind to explain immediately why this delay is necessary again for a process flow which is already a long time ago implemented by (only difference is we want to use a new location what is not that strange in the logistics world). Do not understand me wrong, but I feel this request is not taken seriously by the Schenker logistics group. Please explain me and my management (therefore copied) also your detailed "project" plan, expectation and implementation schedule.

Thanks for your reaction by reply.

Hi, Arnold

I guess we need to re-do all testing again, firstly, we will need to build up stock for 302 to do a full range of testing. Pls advise can we create a new movement type to transfer unrestricted stock from 301 to 302 or vice versa? Instead of performing the below?

1)   To transfer stock location from 301 to 302
-        Send Schenker movement type: 303, to transfer from 301 to hold, so that we can build inventory for 302
-        Send Schenker movement type: 305, to transfer from hold to 302

Subject: RE: New Storage Location Request at Schenker SG Ramp

Hi Rey,

All well received and SAP posting is updated correctly. To finalize the two "transfer" trials I created two IB's to confirm by you.

Following documents:
&#0;.   IB-180102402 with movement type 305 to finalize the 2-steps process "transfer item from location 0301 to 0302"

&#0;.   IB-180102403 with movement type 305 to finalize the 2-steps process "transfer item from location 0302 to 0301"
&#0;.

Remarks:

When the above documents are also correct posted and Schenker can confirm the movement types related to location 0301 we are actually using, will be also activated as copy exact to location 0302, than to my point of view we can bring all into Productive.

Best Regards,
Arnold.

Hi Rey,

Following created:
&#0;.   IB-180102401 with movement type 305 to finalize the 2-steps process "transfer item from location 0302 to 0301" (first step is done/confirmed per OB-80097321 = movement 303).
&#0;.

&#0;.   OB-80097373 with movement type 303 to start the 2-steps process "transfer item from location 0301 to 0302"
&#0;.
&#0;.   OB-80097374 with movement type 303 to start the 2-steps process "transfer item from location 0302 to 0301"
&#0;.
Below a screen of the provided IDoc, which are now at the FTP. Please confirm.

When the OB's are confirmed by you, I will finalize the process with two IB's.
&#0;.
Best Regards,
Arnold.

Hi Rey,

Now all is going smoothly: in our ERP system (testing area) documents are confirmed by EDI. Shall we do some other movement type trials or do you think we can bring all into Productive (finally 0302 should be similar working as 0301).

Thanks to let me know.

Best Regards,
Arnold.

Hi Rey,

I miss the data to recognize the partner profile. Anyway just send me the file and I will compare this also.

By the way: I do not think it makes sense to copy all therefore recommend to do the communication just between you and me. When we come to a decission, we can copy all again.

Thanks,
Arnold.

Hi Rey,

As far I can checked your confirmation file more or less ok except following missing data:

SAPI01   LS I01CLNT100

Impact: document received our Server but can't distribute to SAP (can't find the partner profile=logical system).

As follows a working "confirmation" example with similar data including the missing entries.

Please update your file and resend.

Best Regards,
Arnold.

Hai Reywilson,

Our SAP testing system should be working again. Please check if you find below IDocs at the Server (relevant for location 0302 are the last 4 Docs). After your feedback I will make some additional test cases..... (of course when required).

<image004.gif>

Additional input:
&#0;. IDoc 4771046 = Movement 601 (O/B)
&#0;. IDoc 4771047 = Movement 303 (O/B)
&#0;. IDoc 4771048 = Movement 101 (I/B)
&#0;. IDoc 4771049 = Movement 101 (I/B)

We keep in touch.

Best Regards,
Arnold.

Hi Reywilson,

As information: we as Besi have actually a server issue with our test environment therefore can't provide you some test cases. So either we wait until this is solved or we start carefully with some process cases directly in Productive.
Just tell what you prefer.

Enjoy your evening,
Arnold.

Hai Reywilson,

Location 0302 should be a copy exact of 0301 therefore the actual implemented movement types related to 0301 should be also valid for 0302 (for example: movement type 303 and 305 - two steps transfer from one to the other location - should be possible between location 0301 versus 0302, 0302 versus 0301, 0302 versus 03RE, etc.). Below sheet - column I - the status of implementation (correct me when this file is not up to date) ->

Just tell when you need more information or other help.

Best Regards,
Arnold.

Hi Arnold

We have the following Move Types, will there be a different move type for 301 – 302?
Please provide us the code if there is one.

MOVEMENT	301 or 3RE	**303**	Transfer from storage location A to B within same plant (step 1 -> out of location A)
MOVEMENT	301 or 3RE	**305**	Transfer from storage location A to B within same plant (step 2 -> into location B)
MOVEMENT	301 or 3RE	**321**	Transfer unrestricted stock into quality inspection (reversal)
MOVEMENT	301	**322**	Transfer unrestricted stock into quality

			inspection
MOVEMENT	301 or 3RE	**343**	Transfer unrestricted stock into block (reversal)
MOVEMENT	301 or 3RE	**344**	Transfer unrestricted stock into block

Subject: RE: New Storage Location Request at Schenker SG Ramp

Hi, Arnold

I will need our IT to confirm on the feasibility and for this below email, their email was omitted.

Hi, Pearline
As discussed, pls advise.

Thanks & Best regards

Tay Jyh Huey (Ms)
Manager – Operations
Contract Logistics/SCM, Management

Schenker Singapore (Pte) Ltd
63, Alexandra Terrace, Harbourlink
Warehouse
#05-01 Singapore 119937
DID: +65 63775825   Fax: +65 62730270
Mobile: +65 9788 1478

Hi Jyh Huey,

I am disappointed in the way how Schenker react. Two weeks ago we requested for an improvement of our process and until now I do not see any progress. It feels like Schenker does not take this request serious although we ask for an implementation of September 1st so just two weeks left.
As this is a small request for which I assume the set up at Schenker (IT and operational) will take a few hours, it is still not too late but like to see some interaction.

Thanks for your cooperation.

Best Regards,
Arnold.

Subject: Re: New Storage Location Request at Schenker SG Ramp

Importance: High

Dear Jyh Huey,

As reminder, like to have your reaction/proposal and plan now otherwise we are running into time pressure.

Best Regards,
Arnold.

Subject: New Storage Location Request at Schenker SG Ramp

Dear Jyh Huey,

There is an urgent request for an additional storage location at our Schenker SG ramp, this to make a better MRP planning (not just at plant level only but also separately at location level). The location (0302) will be a copy exact of 0301, therefore setup time very limited. Actually at our ERP system ready for testing but of course should be match/ communicate with your WM system also. Understand at your site you need to do something system wise and of course also operational therefore please your quote plus needed implementation time. Due to the urgency but also the low set up time as long we are talking about a copy exact, we like to reach September first as Go Live.

We are looking forwards to your reaction.

Best Regards,
Arnold.
